Portfolio : <https://manjunathr-portfolio.netlify.app/>

### Professional Summary

Full Stack Developer with 9.5 years of total experience, including 8.8 years in the IT industry. Transitioned from Front-End to Full Stack development, delivering scalable, high-performance applications using React, Python, and AWS. Skilled in writing clean, maintainable code and thriving in agile teams. Early experience as a Transaction Processing Officer involved extracting confidential client data and updating records with precision—reinforcing data integrity, confidentiality, and a disciplined development mindset.

### Technical Skills

- Frontend: React.js, Redux, Next.js, Angular
- Backend: Node.js, FastAPI, Django, Flask, GraphQL
- Cloud & DevOps: AWS (S3, Lambda, EC2), Docker, CI/CD
- Platforms: ServiceNow (Scripting, Workflows)
- Programming Languages: JavaScript (ES6), Python, TypeScript
- Tools & Practices: Git, Agile, Prompt Engineering, Git

### Work Experience

#### Professional Development

**System Design & Data Structures (DSA)** | Self-Paced Learning Dec 2024 – Present

- Continuously enhancing knowledge in scalable architecture, API design, load balancing, caching, and advanced data structures. Practicing DSA through platforms like **LeetCode** and interview-focused resources.

#### Senior Fullstack Developer

**Client:**

**Autodesk India Pvt Ltd** | Bengaluru, KA | August 2020 – December 2024 (4.4 years total)

**Payroll:**

**Kelly Services India Pvt. Ltd** – Aug 2020 to Sep 2024

**Quarks Technosoft Pvt. Ltd** – Sep 2024 to Dec 2024

- Developed scalable dashboards with React + Redux (↑ 40% user engagement). Engineered microservices using
- TypeScript, Node.js & Python (FastAPI) for secure API delivery.
- Automated workflows via ServiceNow custom modules, enhancing internal operations.

#### Senior Software Engineer

**GlobalLogic** | Bengaluru, KA | Jan 2020 – Jun 2020

- Developed a hospital management platform using React.js and Redux.
- Improved frontend performance by 30% using code optimization techniques.
- Collaborated on backend API design and integration.

#### Software Engineer (UI Developer)

**Azent Overseas Education Ltd** | Bengaluru, KA | October 2018 – May 2019

- Designed and customized responsive WordPress themes using HTML, CSS, and basic PHP.
- Collaborated with the marketing team to improve site speed and SEO, contributing to a 25% increase in organic traffic.

## Software Engineer

**Just Dial** | Bengaluru, India | Jan 2015 – Mar 2018

- Built scalable UIs using TypeScript, Angular and React.js for enterprise business tools.
- Integrated MySQL and backend services for dashboard analytics and reporting.
- **Developed type-safe React applications using TypeScript**, improving code reliability and reducing runtime errors.

## Transaction Processing Officer – Level 1

**Mphasis** | Bengaluru, India | Sep 2013 – May 2014

- Handled data collection, validation, and processing tasks with accuracy and efficiency.
- Updated and maintained records in internal software systems as part of daily transaction workflows.
- Ensured data integrity and timely processing in compliance with company standards..

## Education

- MCA, Computer Science, CMRIT, Bengaluru (2010–2013)
- BCA, Computer Science, Krupanidhi Degree College, Bengaluru (2007–2010)

## Projects

### Full Stack Blog Application | Flask, React, JWT, AWS

**Live:** <https://flask-blog-ui.vercel.app> | **Backend:** <https://flask-blog-api-jmh.onrender.com>

**GitHub:**

**Frontend** <https://github.com/Manjunathkrishna/flask-blog-ui>

**Backend** <https://github.com/Manjunathkrishna/flask-blog-api-jwt>

- Built a secure, modular backend using Flask, SQLAlchemy, and JWT.
- Developed RESTful APIs for user registration, login, and CRUD operations on blog posts.
- Designed and deployed a secure blog platform using Flask & React.
- Implemented JWT authentication, protected routes, CRUD operations.
- Tested using Thunder Client and version-controlled via GitHub.
- Deployed using Render & Vercel with CORS handling and token management.
