Work Experience

C1 - Software Architect

Quinnox | Bengaluru, KA | Jul 2025 – June 2026

- Designed and enhanced the user interface for an enterprise waste management pricing tool, enabling accurate and dynamic quote generation for global clients.
- Led the modernization of the system from JDK 8 to JDK 21, improving application performance, scalability, and security compliance.

Senior Full Stack Developer

Client:

Autodesk India Pvt Ltd | Bengaluru, KA | August 2020 – December 2024 (4.4 years total)

Payroll:

Kelly Services India Pvt. Ltd – Aug 2020 to Sep 2024

Quarks Technosoft Pvt. Ltd – Sep 2024 to Dec 2024

- Developed scalable dashboards with React + Redux (↑ 40% user engagement).
- Engineered microservices using Node.js & Python for secure API delivery.
- Developed type-safe React applications using TypeScript, improving code reliability and reducing runtime errors.
- Built dynamic and responsive enterprise applications using Angular, enhancing performance and user interactivity across multiple modules.
- Automated workflows via ServiceNow custom modules, enhancing internal operations.

Senior Software Engineer

GlobalLogic | Bengaluru, KA | Jan 2020 – Jun 2020

- Developed a hospital management platform using React.js and Redux.
- Collaborated on backend API design and integration.

Software Engineer (UI Developer)

Azent Overseas Education Ltd | Bengaluru, KA | October 2018 – May 2019

- Designed and customized responsive WordPress themes using HTML, CSS, and basic PHP.
- Collaborated with the marketing team to improve site speed and SEO, contributing to a 25% increase in organic traffic.

Software Engineer

Just Dial | Bengaluru, India | Jan 2015 – Mar 2018

- Built scalable UIs using Angular and React.js for enterprise business tools.
- Integrated MySQL and backend services for dashboard analytics and reporting.
- Developed and maintained RESTful APIs using Node.js, PHP, and Python (FastAPI) for secure and efficient data delivery
- Utilized TypeScript with React Hooks (useState, useReducer, useRef) to enforce correct state management patterns

Transaction Processing Officer – Level 1

Mphasis | Bengaluru, India | Sep 2013 – May 2014

- Handled data collection, validation, and processing tasks with accuracy and efficiency.
- Updated and maintained records in internal software systems as part of daily transaction workflows.
- Ensured data integrity and timely processing in compliance with company standards..

Education

- MCA, Computer Science, CMRIT, Bengaluru (2010–2013)
- BCA, Computer Science, Krupanidhi Degree College, Bengaluru (2007–2010)

Projects

Full Stack Blog Application | Flask, React, JWT

Live: <https://flask-blog-ui.vercel.app> | **Backend:** <https://flask-blog-api-jmh.onrender.com>

GitHub:

Frontend <https://github.com/Manjunathkrishna/flask-blog-ui>

Backend <https://github.com/Manjunathkrishna/flask-blog-api-jwt>

- Built a secure, modular backend using Flask, SQLAlchemy, and JWT.
- Developed RESTful APIs for user registration, login, and CRUD operations on blog posts.
- Designed and deployed a secure blog platform using Flask & React.
- Implemented JWT authentication, protected routes, CRUD operations.
- Tested using Thunder Client and version-controlled via GitHub.
- Deployed using Render & Vercel with CORS handling and token management.
